

**Product description**

Zettex Protect Wax is a universal, fast-drying protective wax for the long-term protection of metals against rust and corrosion.

Material

Wax

Properties

- Reliable protective wax protects against rust and corrosion.
- Extremely long preservation period (approx. 5 years).
- Based on wax additives.
- Gives outstanding protection against acids and salt.

Applications

As a protective wax against to protect against rust on untreated metal, joints, seams and so on. As an effective adhesive, water-repellent, transparent layer. For the temporary protection of moulds and metal machine components. Remove Zettex Protect Wax from bare metal with Zettex Profi Cleaner.

Available forms

Aerosol 500ml

Colour

Honey transparent

Safety recommendations

See safety information sheet

Technical data

Properties	Specification
Change in condition/boiling point	approx. 60
Density g/ml (20°C)	approx 0,783 DIN 51757
Vapour pressure mbar (20°C)	40
Viscosity mPas (20°C)	<10 dynamic
pH value undiluted (20°C)	not measurable DIN 19261
pH value 1% water-based solution (20°C)	Not measurable
Flash point (°C)	5 DIN 51755
Auto-ignition temperature (°C)	250 DIN 51794
Explosion limits, Lower % vol.	unknown DIN 51649
Explosion limits, Upper % vol.	unknown DIN 51649
Solubility in water (20°C)	20 mg/l
